Overview

Established in 2003, the LexisNexis Special Services Inc. (LNSSI) organization leverages more than 40 years of LexisNexis information solutions expertise to provide global sources of data, data fusion technology and advanced analytics that address challenging and complex analytical and decisioning needs. By delivering identity and risk management solutions, such as the proposed background screening services, along with expert personnel and analytical services, LNSSI supports the specialized mission requirements of government customers.

Through LNSSI, LexisNexis offers expertise within the homeland security, law enforcement, intelligence and defense communities, healthcare, social service, and taxation sectors of the federal government. LNSSI is led and advised by a Board of Directors from the highest ranks of the federal law enforcement, defense, and intelligence communities.

Since 1973, LexisNexis has served as a leading global provider of information-driven solutions for professionals in the legal, risk management, corporate, government, law enforcement, accounting, and academic markets. LexisNexis serves customers in more than 100 countries with more than 15,000 employees worldwide.

Costs pertaining to travel are not included in the prices offered and will be offered at the task order level only as applicable.**

APPENDIX A- Product Descriptions and Prices

OLM – GS-00F-178DA

SIN 561450 (Business Information Services)

The following descriptions are for products currently available through LNSSI's GSA Schedule contract.

Accurint® for Government: This web-based investigative solution is currently used by many federal, state, and local government agencies. It offers instant searchable access to billions of public and proprietary records – data that would take days to collect.

Accurint® for Government Plus: A complement to the online Accurint service, this software application offers additional investigative tools such as expanded link analysis features, the ability to create photo lineups, and advanced geo-spatial/mapping capabilities to overlay and compare data.

Accurint's Virtual Identity Search and Report (VIR): To get an enhanced view into persons of interest, investigators can leverage VIR. This allows an enhanced view into persons of interest, investigators can identify their virtual relationships and associations across more than 40 social networking sites; it offers an alternate view of a subject: their online presence. Investigators do not have to access multiple sites – saving significant time and effort.

Triple Merge Credit Reports: Reliable and timely access to consolidated consumer credit information from all three credit bureaus.

LexisNexis® Batch Services: An advanced solution for importing massive amounts of information at once and performing customized batch lookups against LexisNexis data.

Accurint® XML: A robust tool for integrating automated access to LexisNexis public and proprietary records data into internal tools or third-party applications.

LexisNexis® Instant Verify: A real-time identity verification solution that validates whether the subject identity exists. Instant Verify goes beyond standard wallet verification to provide age verification, occupancy, high-risk address, and phone checks. Available with **Instant Age**.

LexisNexis® Instant Authenticate: A real-time, interactive quiz that generates customized out-of-wallet (OOW) questions and tests individuals' knowledge of that information, increasing the assurance that an individual is who he or she claims to be.

LexisNexis® InstantID®: Q&A as an optional OTP strengthening solution. InstantID Q&A confirms a consumer's identity in seconds and gives customers an easy, real-time way to fight identity fraud at multiple points of customer contact.

LexisNexis® FraudPoint®: FraudPoint Score and FraudPoint Attributes, a non-FCRA solution, help address the evolving and emerging challenges posed by identity fraud and strengthen our customers' existing fraud mitigation strategies.

LexisNexis® Flex ID®: Flex ID provides powerful data reach while supporting your need for agile verification processes that can continually adjust to serve changing marketplaces. Flex ID delivers the verification fundamentals needed to complete decisioning and conduct business.

Multi-Factor Authentication (MFA): LexisNexis offers a suite of MFA solutions designed to address security needs while enabling agencies to function quickly and efficiently.

LexisNexis offers a suite of MFA solutions designed to address security needs while enabling business to function quickly and efficiently. This suite includes:

LexisNexis® Voice Biometrics: A high degree of security for remote, high-risk transactions with little to no impact on the user experience. It is ideal for agencies that process a significant volume of high risk transactions remotely or within a contact center environment. As unique to someone as a fingerprint, a voice biometric (or "voice print") uses the sound, pattern and rhythm of a person's voice to determine their identity.

LexisNexis® IVR On Demand: This offering combines your agency's Interactive Voice Response (IVR) solution with voice verification and authentication – providing a way to quickly, conveniently and securely access personal information over the phone to identify customers. It provides agencies a single source for authenticated enrollment and repeat user verification with instant access in any channel. Users can access IVR On Demand from a variety of media, including web, voice, and mobile.

LexisNexis® One-Time Password: An out-of-band authentication method that provides the ability to have stronger authentication during high risk, high value transactions. It offers a time-sensitive, unique random passcode via SMS, text, e-mail, or phone and is ideal for providing a MFA solution. No hardware (electronic fob, etc.) other than the user's existing phone or personal computer is required.

LexisNexis® TrueID®: Support for any face-to-face transaction that requires identity and identity document verification. It binds proofed identities at enrollment to users that come in for repeat access. It can also capture and authenticate identity documents.

Credit Card Account Verification: This service uses an individual's name, address, and credit card digits as a mechanism to confirm whether they are who they say they are.

LexisNexis® InstantID® International: This service offers automated identity proofing using multi-source verification data from 14 international countries.

LexisNexis® InstantID® Q&A UK: An authentication solution that uses a series of challenge questions, including "red herring" or "trick" questions, for confirming identity. It can proof UK-based identities to support international identity proofing needs.

LexisNexis® Chargeback Defender®: This solution leverages public records data to search for suspicious activity and potentially fraudulent identity manipulation. It finds high-risk credit card transactions and distills the results into an intuitive risk score.

LexisNexis® FraudPoint®: An advanced fraud prevention and detection solution that delivers real-time visibility into identity activity and identity behavior.

LexisNexis® RiskView™ is a comprehensive suite of proven credit risk management data analysis tools, based on non-traditional trade line data. These credit risk modeling tools increase predictive intelligence far beyond traditional credit bureau scoring. This is a FCRA product and available with **Batch** and **XML**.

LexisNexis® Behavioral Assessment®: Behavioral biometrics uses data science and machine learning to perform a quick, behind-the-scenes analysis of an applicant's interaction data. Fraudulent activity is identified by analyzing anonymized input data of the user keyboard usage, mouse movements, manipulation of special keys, and other variables.

LexisNexis® Device Assessment®: Profiles all devices accessing your Web sites and your native mobile application, including desktops, laptops, smartphones, or tablets, to detect fictitious or stolen identities, suspicious devices, spoofed IP addresses, and the presence of malware or other anomalies that might indicate a high-risk application.

ThreatMetrix® for Government: With Government agencies shifting toward a digital environment, the ability to assess an individual's digital identity (IP address, device, online behavior, etc.) is important when the individual is transacting with a government agency. ThreatMetrix® for Government is a digital identity assessment product that provides agencies with real-time intelligence when assessing identities and digital transactions. During a transaction, this product captures information about an individual's identity and the device they are using and returns a highly configurable risk assessment based on hundreds of attributes.

Digital Identity and Physical Identity

Digital Identity (ThreatMetrix Data)	Physical Identity (Public Records)
Devices and phone numbers associated with devices	Address, zip code, lifestyle
Locations	Vehicles (car, plane, boats)
Past online/location behavior	Property
Logins	Professional Licenses (nurse, doctor)
Types and frequency of transactions (payments and new account creations)	Education credentials; Owner of a business
Billing and shipping address	Public records and other data linked with a unique identifier (LexID)

Please note that certain solutions (such as the online Accurint for Government service, Accurint for Government Plus software, Batch Services and Accurint XML) are only available to the government market.

 Other discounts/concessions offered: None

Batch Services

LexisNexis® Batch Services allow agencies to import massive amounts of records all at once and to perform a batch lookup against our unparalleled collection of commercially available data. The results of these lookups can be accessed online via formatted reports or provided in a mutually agreed upon customized output format.

Our Batch Services are available as both a non-FCRA solution (standard) as well as a FCRA solution for specialized needs around compliance with the rules and regulations of the Fair Credit Reporting Act (FCRA).

BATCH FEATURE (NON-FCRA)	Charged Per Hit or Per Input	GSA Price (w/IEE)

Accurint® XML (Pricing is per hit unless otherwise indicated)

LexisNexis can deliver access to Accurint through an XML-based Application Programming Interface (API). This API, called Accurint® XML, serves as a powerful, easy-to-use resource for seamlessly integrating access to the extensive LexisNexis collection of public and proprietary records into internal tools and applications. It leverages an XML feed for machine-to-machine interactions with LexisNexis databases.

Using Accurint XML provides the benefits of moving internal applications from pure web-based searching to a service-oriented architecture (SOA). It helps to maximize budget and personnel resources by automating public records searches.

APPENDIX B – Labor Category Descriptions and Rates

OLM – GS-00F-178DA

SIN 561450 (Business Information Services)

Labor Category Title: Program Manager

Functional Responsibility

Duties include but are not limited to:

- Management of multiple projects or multi-phased projects
- Work collaboratively with Government Program Manager and other Program entities to ensure success
- Provide program briefings and periodic reports to Government Executives
- Mentor Project Managers and Technical Leads
- Serves on the project's Executive Committee

Minimum Accepted Education: Bachelor's degree or equivalent experience.

Minimum Accepted Years of Experience: Ten (10) years of related industry experience.

Labor Category Title: Project Manager

Functional Responsibility

Duties include but are not limited to:

- Day-to-day management of the assigned project
- Develop, manage and maintain project plan and project standards
- Acquire, assign and manage project resources and facilities
- Develop and conduct Project Team Orientation sessions
- Develop and conduct Project Team Kick-off session
- Develop, manage and maintain issues list
- Proactively anticipate project deviations and communicate corrective action and escalation
- Understand business processes and integrations
- Participate in Executive Committee meetings when appropriate
- Manage project metrics; e.g. budget, scope, milestone attainment, deliverable sign-off, etc.
- Monitoring and reporting project progress.

Minimum Accepted Education: Bachelor's degree or equivalent experience.

Minimum Accepted Years of Experience: Three to Five (3-5) years of related experience

Labor Category Title: Database Administrator

Functional Responsibility

Duties include but are not limited to:

- Install and configure the database management system software
- Create and manage login accounts and security
- Grant roles and permissions to users
- Manage and monitor the use of disk space, memory and connections
- and maintain the databases
- Perform backup and recovery procedures

- Diagnose system problems
- Provide database search expertise in tuning queries
- Participate in design reviews and provide input to database architecture, design and implementation processes
- Performance and tuning

Minimum Accepted Education: Bachelor's degree or equivalent experience.

Minimum Accepted Years of Experience: Two (2) years of related industry experience.

Labor Category Title: Data Analyst

Functional Responsibility

Duties include but are not limited to:

- Analyze data and metadata structure, format, type and coherence to suggest optimal Extract, Transform, Load (ETL) procedures
- Apply statistical analysis to discover data relationships
- Recommend optimal data manipulation and storage technology
- Create and published periodic reports; make necessary recommendations
- Provide expertise in database software, standard query and reporting tools and statistical software

Minimum Accepted Education: Bachelor's degree or equivalent experience.

Minimum Accepted Years of Experience: Two (2) years of related industry experience.

Labor Category Title: Principal Enterprise Control Language (ECL) Data Developer

Functional Responsibility

Duties include but are not limited to:

- Discovers or develops source datasets for populating the system
- Established ontology and metadata definitions
- Implements the schema for transport and database load
- Advises system administrators on Extract, Transform, Load (ETL) considerations
- Develops and implements data access through ECL programming
- Instructs data developers and customers on Extract, Transform, Load (ETL) techniques, efficiencies, and privacy regulation considerations

Minimum Accepted Education: Bachelor's degree or equivalent experience.

Minimum Accepted Years of Experience: Eight (8) years of related industry experience.

Labor Category Title: Senior Enterprise Control Language (ECL) Data Developer

Functional Responsibility

Duties include but are not limited to:

- Discovers or develops source datasets for populating the system
- Established ontology and metadata definitions
- Implements the schema for transport and database load
- Advises system administrators on Extract, Transform, Load (ETL) considerations

- Develops and implements data access through ECL programming

Minimum Accepted Education: Bachelor's degree or equivalent experience.

Minimum Accepted Years of Experience: Five (5) years of related industry experience.

Labor Category Title: Enterprise Control Language (ECL) Data Developer

Functional Responsibility

Duties include but are not limited to:

- Discovers or develops source datasets for populating the system
- Established ontology and metadata definitions
- Implements the schema for transport and database load
- Develops and implements data access through ECL programming

Minimum Accepted Education: Bachelor's degree or equivalent experience.

Minimum Accepted Years of Experience: Two (2) years of related industry experience.

Labor Category Title: Principal Software Engineer

Functional Responsibility

Duties include but are not limited to:

- Conducts interviews to gather and analyze system requirements
- Designs programming specification
- Defines and evaluates system workflows
- Identifies system bottlenecks and areas of performance degradation
- Takes corrective action
- Supervises other System Engineers
- Contributes to program reports, configuration management processes, design reviews and test specification.
- Mentors other Software Engineers

Minimum Accepted Education: Bachelor's degree or equivalent experience.

Minimum Accepted Years of Experience: Five (5) years of related industry experience.

Labor Category Title: Senior Software Engineer

Functional Responsibility

Duties include but are not limited to:

- Provide technical guidance in one or more areas of expertise
- Provide technical design, engineering and integration
- Implement the system design through code
- Document the code to standards
- Unit test
- Submit code to Configuration Management
- Provide support for Change Requests and implementation of new requirements

Minimum Accepted Education: Bachelor's degree or equivalent experience.

Minimum Accepted Years of Experience: Two (2) years of related industry experience.

Labor Category Title: Software Engineer

Functional Responsibility

Duties include but are not limited to:

- Develop code modules/objects according to design specifications
- Establish appropriate Unit and Group test procedures
- Debug and refine code modules in response to Change Requests
- Create accurate code and user documentation
- Employ proper configuration management practices

Minimum Accepted Education: Associate's Degree or equivalent experience.

Minimum Accepted Years of Experience: None

Labor Category Title: Senior Systems Administrator

Functional Responsibility

Duties include but are not limited to:

- Hardware installation and configuration
- Operations support for multi-server or multi-network configuration
- Operating System installation and maintenance
- User support to include account creation, system access and use.
- Optimize system operation and resource utilization
- System capacity analysis and planning.
- Mentor and lead other Systems Administrators

Minimum Accepted Education: Bachelor's degree or equivalent experience.

Minimum Accepted Years of Experience: Five (5) years of related industry experience.

Labor Category Title: Systems Administrator

Functional Responsibility

Duties include but are not limited to:

- Hardware installation and configuration
- Operating System installation and maintenance
- User support to include account creation, system access and use.
- Optimize system operation and resource utilization
- System capacity analysis and planning.

Minimum Accepted Education: Bachelor's degree or equivalent experience.

Minimum Accepted Years of Experience: Two (2) years of related industry experience.

Labor Category Title: Subject Matter Expert

Functional Responsibility

Duties include but are not limited to:

- Application of recognized industry or academic expertise in one or more of the project-required subject disciplines or operational areas.
- Knowledge of a technical or functional area that enhances a team's understanding of various legacy processes.
- Performs research, design assessment, development, integration and other assignments in a specific technical or functional area.
- Helps refine and determine feasibility, correctness and completeness of end-user requirements.
- Leads research, analysis and development in the area of expertise to enhance requirements definition, detailed design and user-friendly implementation of complex systems.
- Supervises a small team of systems engineers or functional analysts.
- May perform other duties, as assigned.

Minimum Accepted Education: Bachelor's degree or equivalent experience.

Minimum Accepted Years of Experience: Two (2) years of related industry or government experience. This experience has provided this SME with detailed knowledge of technology, processes, people or systems crucial to the successful implementation of the project objectives.

LexisNexis recognizes that both education and experience contribute to the value of the services we provide. Education and experience may be substituted for each other with one year of relevant experience being substituted for one year of education, and vice versa. In addition, professional certifications, professional licenses and vocational training may be substituted for experience or education.

Degree	Experience Equivalent	Other Equivalence
Associates	1-year relevant experience	Vocational or technical training in work-related field
Bachelors	Associate degree + 2 years relevant experience, or 4 years relevant experience	Professional certification
Masters	Bachelors + 2 years relevant experience, or Associates + 4 years relevant experience	Professional license
Doctorate	Masters + 2 years relevant experience, or Bachelors + 4 years relevant experience	

LexisNexis further recognizes that, on occasion, there may be a need to waive the education and experience requirements in order to engage a subject matter expert or use the best individual for the task. We expect that waivers to the education/experience requirements may be granted by either the Task Order Contracting Officer or Contracting Officer Technical Representative. Should the waiver be included in our proposal, award of said proposal shall be deemed a grant of the waiver.
